Vision

„A new Generation of Giving”

We have a vision.

A new Generation of Giving.

Each of us carries altruism, the need to help others. We will give people the chance to fulfill their need to help by offering them the opportunity to make an active and sustainable social impact in the fields of environmental protection, humanitarian aid and animal welfare with little effort, just by giving money.

We will create a positive and sustainable change in the monetary giving behavior. We will create new givers. We will change people's awareness of monetary giving in the long term because everyone has the opportunity and the responsibility to help at least with a small monetary giving.

We will create a "**New Generation of Giving**".

Be part of the "**New Generation of Giving**".
